

# THE SPINDLE TAPE - EFX

**ELGITEX**

# The Spin that saves the energy and the earth

Energy has become an important component in textile industry. Due to latest high speed machines, power requirement has increased. About 50 to 60% of the total energy is consumed by ring frames, of this 33% is consumed for driving the spindles.

In today's energy crisis it has become a challenge for textile mills to conserve energy. Our innovative technology has created EFX spindle tapes that ensure minimal slip from pulley to spindle, and outperforms regular spindle tapes.

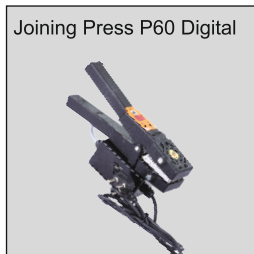

## FEATURES

- Saves power
- High modulus reinforcement fabric
- Thermoplastic Polythurethane surface
- High Performance special grade TPU
- Finger Joint
- Anti Staticaly equipped

## BENEFITS

- Saves Energy 3 to 6%
- Higher Spindle RPM
- Instantaneous speed pickup
- Flexible finger joint - No jerk
- Minimum change in Jockey Pulley centre distance
- No fluff accumulation
- Better yarn quality

## JOINING ACCESSORIES

An ISO 9001 Company

**ELGI ULTRA PRIVATE LIMITED**
