

Caprobond Technology ensures efficient transmission

G1 tapes are designed to perfection and build to perform. The tapes are versatile to suit wide range of spindle speeds from medium to high. Consistent spindle speeds are ensured throughout the life span due to optimum slip from pulley to spindle wharve achieved through state of art Caprobond Technology.

THE SPINDLE TAPE - G1

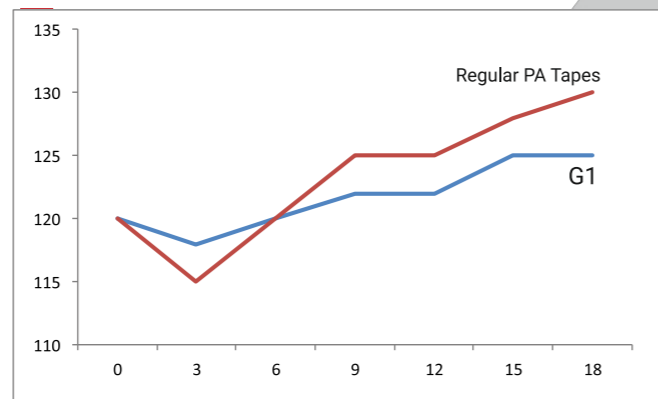

FEATURES

- Improved rubber surface
- Special grade NBR rubber
- High modulus reinforced fabric
- Better flexibility
- Anti Staticaly equipped

BENEFITS

- Well maintained Jockey pulley centre distance
- Uniform grip throughout the life span
- Better yarn quality
- Higher Spindles speeds
- Consistent performance over a period of time
- No fluff accumulation
